PLAYING THE GAME:
The game begins with a brief Introduction. After the Introduction, the playing field will be displayed, and the computer will ask "1 or 2 PLAYERS??" Answer this question by pressing the 1 or 2 key respectively.

OBJECTIVE: The objective in BUZZARD BAIT is to proceed to higher levels of difficulty by destroying all of the enemies for every wave.

HOW TO FLY: Pressing the Button on the Player's Joystick causes the Player's bird to flap its wings once. The bird will fly in the direction indicated by the Player's Joystick.

JOSTLING: To dismount an enemy or opponent, you must fly into him with your lance above his. You will lose the joust if your lance is below his. If the two lances are even, neither bird is dismounted.

EGGS: After an enemy bird has been dismounted, his empty bird flies off the screen, however the rider of the bird is transformed into an unhatched Egg. After a short time, the Egg begins to hatch, and once hatched, the rider will be picked up by another bird. To stop this regeneration process, a Player must capture (touch) the Egg. Capturing an Egg yields a Player a point value that is based on the number of Eggs that he has already captured (see POINT VALUES). A 500 point bonus is awarded for capturing an Egg before it touches a Land Mass.

LAND MASSES: As the game progresses, certain Land Masses crumble away. This not only gives you and your enemies more room to fly, but it also allows for strategic maneuvering.

PTERODACTYL: After a Player has remained on a wave for some time, the PTERODACTYL will fly onto the screen. Touching the PTERODACTYL is fatal. The only known method of killing the PTERODACTYL is to fly into it in his throat.

PHASING IN: Once a Player has remained on a wave for some time, the Player's bird will fly off the screen. Assuming that he has not already been dismounted, this bird will then be Phase back into the playing field on one of the four white Phasing Pads. The Phasing (which is the color of the Player's rider) will last for a few seconds or until the Player's Joystick Button is pressed.

LANGUARD: On either side of the lowest Land Mass, the Land Pits can be seen. During the first two waves, these Pits are covered by a structure. By the third wave, however, the Land has risen so high that the structure that had been above water four, the Pits are inherited by the Land Mass. This hand grubs passing birds and pulls them into the Land. Note that once a bird has touched the Land, there is no way to escape.

RESTARTING: At any time during the game, you may press the "R" key to restart the game. Once a game has ended, pressing the button on your Joystick will restart the game.

PAUSING: At any time during the game, you may press the "P" key to stop the action. To continue, simply press any key or Joystick button.
