QUIX
©1984

For The Tandy Colour Computer
This is a popular arcade game with a similar name. Simply frustrating - you'll love it.

Done in high resolution graphics with Super Sound.

LOADING INSTRUCTIONS:
TAPE - LOAD "QUIX" - Program will auto execute
DISK - LOAD "QUIX" - Program will auto execute

INSTRUCTIONS:
When you get past the title page, you will see the game screen. The red bloody lines bounding on the screen are the Quix's and the yellow blinking things are called the sparklers. They work with the Quix's to try to keep you from reaching your goal. There is one other enemy, but I will tell you more later about it. Your goal is to fill in 75% of the screen. More on how to do that later.

Now to explain the things at the bottom of the screen. The numbers in the left are the players score and on the right are the high score.

The word Quix is in the middle serves 3 purposes. First its the title of the game. It changes color to show what color the shape will be painted in and it shows by getting thinner the number of men you have hit.

There are three different widths to the word, the wider the more men you have. You start the game with a thin and you can't get more than that.

The red line shows how much time you have until you come back on the screen. You don't have to wait just press the button.

The blue shows how much is left to paint. Each notch is 25% and if the whole line is gone then 100% is painted.

To work the man use the joystick to move the man in any of the 4 directions. Try moving the stick up for a while, then left, then down. You should have made a box at the bottom of the screen that is filled in blue. You now have a score. You received 1 point for each dot in the box. If you do the same thing but keep the button held down from start to end of draw you will get a red box to show that you have gotten 2 points for each dot in the box. Notice the blue line shortening. After 75% is reached you get a bonus of 4 points for every dot over 75%. You always get 1 point for each dot of line used to make the shape.

There are rules to drawing. The first rule is don't stop drawing or a fuse will start burning up the wick and it touches you then you will lose a man. The second rule is that you can't touch yourself while drawing. You can only touch a wall. The sparklers that go around the screen are used to force the player into the open for the Quix. If either touch you, you lose a man.

To obtain a free man you have to be good enough to get 2 Quix's, if you separate the pair one will die and you will get a free man.

Now a little about the levels. You move up a level each clearing of the screen.

Level #1: ONE QUIX

#2 ONE QUIX & TWO SPARKLERS

#3 TWO QUIX & TWO SPARKLERS

#4 ONE QUIX & FOUR SPARKLERS

#5 TWO QUIX & FOUR SPARKLERS

#6 TWO QUIX & FOUR SPARKLERS THAT FOLLOW YOU

#7 TWO QUIX & SPARKLERS THAT BOUNCE OFF EACH OTHER AND TWO SPARKLERS THAT FOLLOW YOU

#8 SAME AS LEVEL #7 BUT QUIX RANDOMLY BOUNCE OFF EACH OTHER

#9 SAME AS LEVEL #8 BUT SPARKS ARE FASTER

#10 SAME AS LEVEL #9 BUT SPARKS ARE FASTER

#11 SAME AS LEVEL #10 BUT QUIX SPEEDS UP

#12 SAME AS LEVEL #11 BUT QUIX SPEEDS UP

#13 FROM HERE ON THE GAME GOES FASTER

For a sparkler to follow you up your line you go up a corner and its if its moving in the same direction.
This one is after a popular arcade game with a similar name. Simply frustrating—you'll love it. Done in high-resolution graphics with Super Sound.
